

As the global leader in precast concrete, Spancrete® products do more than create a structure: they help build your vision. Whether you're constructing a new warehouse or manufacturing facility or erecting a new corporate office or large-scale storefront, Spancrete Brand precast products offer unmatched reliability, versatility and quality.

Long-Lasting, Durable and Attractive

Spancrete Brand precast products provide durable and highly adaptable solutions for the construction of new commercial and industrial facilities and the expansion of existing ones. Our precast construction components have been heavily relied upon for a wide range of applications since 1946, including interior and exterior walls and supporting everything from roofs to mezzanines, raised walkways and other architectural features unique to your facility. At Spancrete, our ultimate goal is to provide personalized, enduring solutions for your new building, and that means working closely with you and your engineers to construct a quality structure. We don't simply offer a one-size-fits-all solution – every industrial and commercial construction project is as unique as your business.

Safe, Cost Effective and Faster Construction

For any new commercial or industrial building, the ultimate objective is quality, safety and efficiency. Our preformed, prestressed panels and planks require less maintenance, withstand the stresses of shifting environmental conditions and can even help lower construction costs, benefits traditional building materials can't match. We know that the longer it takes to finish a structure, the longer it takes to begin production and bring in new revenue. The speedy installation of Spancrete Brand precast products helps reduce construction timetables, meaning you can be up and running faster than expected, something we can both stand behind.

Flexible Designs and Custom Options

With Spancrete Brand precast products, no two facilities are the same. Our precast, prestressed building components can be designed, constructed and installed based on your preferences, which offers the flexibility that today's industrial and commercial facility designers need to create truly impressive structures. With a wide variety of surface textures and finishes, including ribbed, raked, broomed, sandblasted and exposed aggregate, your new warehouse, manufacturing center or corporate headquarters won't just show your company's quality – it'll attract the attention you deserve.

We Built That™

Since our first projects almost 70 years ago, Spancrete has been wholly dedicated to providing the best precast products and customer service in the industry. By partnering with our customers and working to fully understand and develop your vision, we help turn your plans into amazing reality. We're only satisfied when our customers get what they want, and that means working closely with you to ensure quality results. At the end of the day, when your project is finished and you are fully satisfied and pleased with your facility, we will stand before it, shake hands and say, "We Built That."
