

Whether you need to match an existing building, mimic the look of traditional brick or stone, or develop a signature look through sandblasting, acid etching or other unique treatments, Wells offers endless precast solutions for architectural needs. As leaders in precast production and design, we're prepared to customize panels to fit seamlessly with your project — and your vision.

Precast Advantage

Architectural precast solutions pair beauty with unrivaled strength — protecting your structure from weather extremes, blast, fire and insect infestation. They also provide cost-savings over traditional building materials and construction techniques — without sacrificing quality, durability or design flexibility.

- **Aesthetic Versatility**
 Unlimited surface textures, decorative finish options, colors and detailing techniques to help meet unique design requirements.
- **Energy Efficiency**
 Superior thermal performance to help reduce heating and cooling costs.
- **Accelerated Construction**
 All-weather construction for efficient, year-round enhancements to meet any deadline.
- **Safety and Protection**
 Resistant to fire, pests, blast and harsh weather conditions to protect a building's structural integrity.
- **Noise Reductions**
 Excellent sound absorption, creating spaces that are easy on the eyes and easy on the ears.
- **Reduced Life Cycle Costs**
 Low maintenance and highly durable, helping structures stand the test of time; the average building lifespan is over 100 years.

Precast Architectural Solutions

Wells diverse selection of architectural solutions allow us to provide durability and versatility for any project. Our architectural precast is a convenient and cost-effective way to ensure your project makes a lasting impression.

The Wells Difference

Whether new construction or building expansion, each new project begins with a unique vision — and unique parameters. From concept through completion, Wells collaborates with architects and builders to make their work a true work of art while ensuring that projects are completed on time and on budget.

We do this by keeping the entire life cycle at the forefront when building a structure. Our collaborative approach can:

- Effortlessly achieve your unique vision and aesthetic
- Accelerate the design-build process
- Compress schedules and reduce costs
- Deliver cost and schedule certainty
- Optimize design for efficiency and flexibility
- Reduce owner risk

Decorative finishes in virtually unlimited colors, patterns and textures
