

You will know when you enter a sports and entertainment complex featuring Spancrete construction. Our innovative, creative designs provide safe seating for fans, wide-open spaces and visible dedication to quality and durability.

Building Together

We've built some of the most recognizable entertainment complexes in the country. As part of your team, we care about the finished product and want to collaborate with you to provide not only the best value throughout the building and planning process, but the best experience.

We keep the entire lifecycle at the forefront when building a structure. Our collaborative approach can:

- Compress schedules and reduce costs
- Reduce risk for the owner
- Deliver cost and schedule certainty
- Optimize design for prefabrication and efficiency
- Accelerate the design-build process

Dedication to Versatility

Our clients expect facilities that can be used for more than just their basic purpose. In a world where efficiency is key, ensuring that sport and entertainment complexes are versatile is one of our top priorities. We understand what it takes to build a facility that creates an unforgettable fan experience with room for fields, stages and courts that are just as tough as the athletes and performers that play on them. We focus on designing structures that integrate the various needs of each facility.

Architectural Innovation – Inside and Out

Just like every sports team has its own character, so should the buildings in which they play. Spancrete’s architectural precast solutions bring a level of customization unavailable with other materials. Architectural facades and graphic concrete treatment on wall panels offer endless options to add detail to any building and also deliver unrivaled strength and durability, while withstanding harsh weather conditions and offering fire and pest resistance.

Meanwhile, on a building’s interior, Spancrete precast beams and columns used in conjunction with precast risers reduces column counts, providing wider open space for better views. Keeping the focus on the court or stage, where it should be.

The Spancrete Difference

With rapid, year-round construction capabilities, no on-site storage of materials and renowned design flexibility, Spancrete precast solutions are ideal for accommodating an accelerated construction schedule often required for new venues. Our precast solutions require very low maintenance to ensure buildings stand the test of time. The structures we create together are durable, efficient and affordable.

Quality. Service. Innovation.
