

MACHINERY FABRICATION SERVICES

With over 70 years' experience in precast production and service, Spancrete® proudly offers fabrication services to provide steel weldments and connections for precast panels, ensuring their strength, reliability, durability and longevity. Specializing in structural steel with rebar and/or studded weldments, Spancrete can customize pieces in quantities of all sizes — whether you need 10 or 1,000 — all while accommodating your needs for rapid turnaround and jobsite delivery.

Machinery Fabrication Service Offerings

- Plate, channel and angle weldments
- Stud welding with a wide variety of stud sizes already in stock
- Shot blasting
- Priming, painting and galvanizing options

THE SPANCRETE DIFFERENCE

As a leading provider of precast building solutions, Spancrete extends far beyond just the machinery and product output – our unmatched expertise also allows us to provide exceptional fabrication and production support services to help our customers succeed.

- Top-quality, customized weldments
- Post-fabrication processing and surface treatment options
- Accommodating quantities of any size
- Delivery to factory or jobsite
- Rapid turn-around times and same day services available

We understand the challenges faced by manufactures and are dedicated to continuing to innovate and offer quality solutions for producers of all sizes.
