

Spancrete® brand precast products provide safe, speedy, cost-effective solutions for institutional construction and related projects that benefit both the campus and the community.

Building Brighter Futures

From K-12 schools to universities, tech schools and other higher-learning institutions, Spancrete® is at the head of its class when it comes to constructing teaching facilities, sports complexes, classrooms, dormitories, gymnasiums and swimming pools, auditoriums and other education-related structures.

With our ability for year-round construction and fast-track building methods, Spancrete® ensures projects are completed on time and within budget so classes, sporting events and other programs can continue as scheduled.

A Safe, Positive Environment

Spancrete® has the highest reputation for structural quality and integrity in institutional construction. The academic experience is enhanced for students and faculty through excellent noise containment, more efficient heating and cooling, and vital protection in the instance of fire or severe weather. In fact, Spancrete® precast structures can serve as community gathering places in the event of a hurricane, tornado or other severe storm.

What's more, our structures are also exceptionally resistant to pests and are not significantly impacted by elements such as humidity, corrosive materials and direct impact.

Attract More Students, Spectators & Supporters

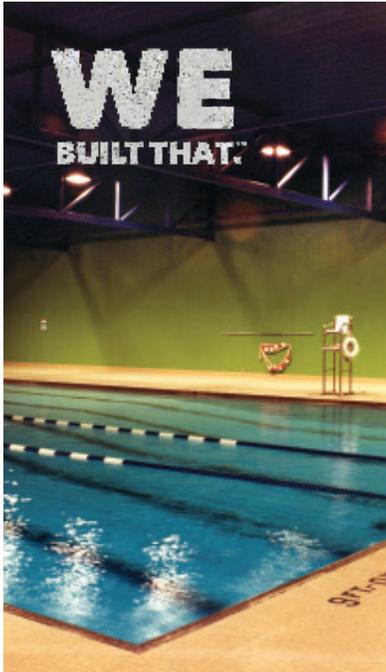

When it comes to creating large, open spaces for arenas, auditoriums and lecture halls, Spancrete® offers unmatched flexibility and innovative construction solutions. Load-bearing panels leave interior spaces open for unobstructed views that are perfect for watching presentations, performances and athletic events. Plus, Spancrete® can construct stadium seating to ensure maximum capacity for the space available.

Spancrete® can also easily install add-on panels to the structure and quickly reconfigured interiors when it's time to expand a facility. The finished look is even customizable to meet your needs and match other structures around campus.

The Spancrete® Difference

Spancrete® delivers an intelligent, new method of construction through our fresh approach to building design. School districts and governing boards hold the long-term durability, minimal maintenance and cost-effective qualities of Spancrete® structures in high regard. And students, parents, faculty and alumni appreciate the attractive, safe surroundings Spancrete® buildings provide for their studies, everyday living, athletics and enlightenment.

With impressive speed of erection and construction cost-efficiencies, no need to store materials on site, and the flexibility of design to fit various amenities today and in the future, Spancrete® is the smart choice for institutional construction.

Spancrete® is *Building Innovation*™.
