

MAKE AN IMPRESSION.

Precast concrete leaves an artistic, lasting imprint on your design.

FROM VISION TO REALITY.

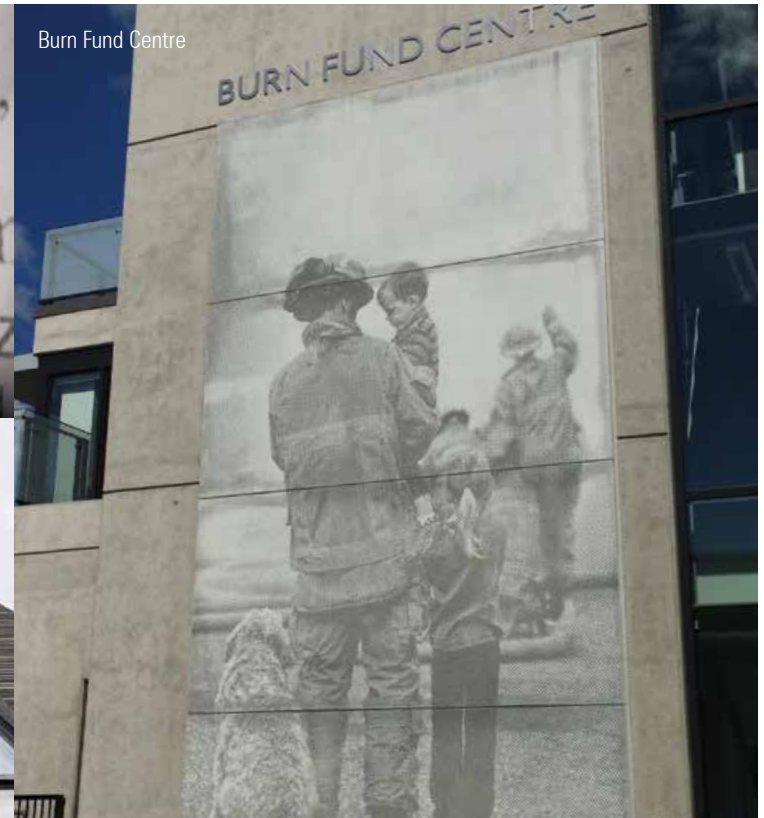

Precast is one of the most durable and maintenance-free building materials available. Now, it is also one of the most customizable and beautiful. Graphic Concrete technology used by Spancrete transfers patterns and colors onto precast slabs, leaving behind a customized piece of art that is 100% concrete, durable and maintenance-free. It is a cost-effective way to add additional design elements to any project. And Spancrete is with you every step of the way – from determining how to transfer your design to precast, to choosing aggregates and pigments – we can make your vision a reality.

As Oy Kuopion Majakka Housing

Available exclusively in North America through AltusGroup precasters, Graphic Concrete technology allows you to impart durable patterns and images onto precast surfaces such as facades, walls, spandrels and soundwalls. It opens up a bold new range of design possibilities for architects while providing the renowned resilience of precast concrete.

**Call us today for
a discussion about
your next project
or a lunch-and-learn
presentation.**

These patterns represent only a handful of stock designs available. Custom designs and images are possible as well. Visit graphicconcrete.com/en or give us a call.
